

**Description:** Guide to using the ICONICS Web Licensing Utility for Hardware Keys.

**OS Requirement:** Win 2000, XP Pro, Server 2003, Vista, Server 2008, Windows 7

**General Requirement:** Internet Browser (recommended Internet Explorer V6 or higher), New ICONICS USB Hardware Key (See Figure 1), Installation of ICONICS Licensing Software 9.2 or higher.

Figure 1 - ICONICS USB Hardware Key

## Basic Steps

Regardless if you want to program, add/remove, or kill a license, you will first need to do the following.

1. Plug the ICONICS USB Hardware Key into your PC. Your computer should recognize the key and try to install the drivers.
2. Go to [www.iconics.com/supportworx](http://www.iconics.com/supportworx) and click on the License Product link on the right.
3. In the new page that comes up, click on the Hardware button.
4. Enter your e-mail address and password to login. If you have not previously created a login to the Web Licensing Utility, click Create New Account to create your login.

## Program License

ICONICS ships our license keys without any programmed license. This gives you the flexibility in programming the necessary license when you want and where you want. You can follow the steps below to program your license key.

**NOTE:** It is possible to put licenses for version 9.22 and 10.6 on the same key. Similarly, you can put licenses for versions 9.2 and 10.5 ; 9.13 and 10.02 on the same key.

1. Once you are logged in, select Program License from the top menu.
2. Depending on your security settings, you may need to click on the yellow bar at the top of your window to allow the ActiveX control.

**NOTE:** You must install the ActiveX to continue. This will install drivers for the license key as well.

3. Click on the Next button and confirm the popup message regarding the serial number of the key.

4. Enter your Product Registration #(s) and Customer Key(s) and click Next.
5. Enter the End User information either by selecting from the Existing End Users list or entering a new one by clicking the Create New link and click Next.
6. Select the Product(s) that you would like programmed to the USB Hardware Key and click Next.
7. Review Product(s) that will be programmed to the USB Hardware Key and click Complete.
8. Your USB Hardware Key has now been programmed and is ready to be used.

## Add/Remove License

If you have purchased a new Product that you would like to add to your USB Hardware Key, or if you want to remove certain Products already programmed on your USB Hardware Key, you can follow these steps.

1. Login to the ICONICS Web Licensing site as described previously and select Program License from the top menu.
2. Click on the Next button and confirm the popup message regarding the serial number of the key.
3. Enter your Product Registration #(s) and Customer Key(s) and click Next.

**NOTE:** If you only want to Remove Product(s), do not enter the Product Registration Number. You can just click Next.

4. The End User information should populate based on the End User originally entered/selected. Click Next.
5. Uncheck any Product(s) that are currently licensed to Remove and/or check any Product(s) that you would like to Add to your USB Hardware Key and click Next.
6. Review Product(s) that will be programmed to the USB Hardware Key and click Complete.
7. Your USB Hardware Key has now been reprogrammed and is ready to be used.

## Kill License

To remove all Products from your USB Hardware Key and format it clean, you can follow these steps.

1. Login to the ICONICS Web Licensing site as described previously and select Kill License from the top menu.
2. Click on the Next button and confirm the popup message regarding the serial number of the key.
3. Click Complete and click OK to the two confirmation messages.
4. The license on your USB Hardware Key has now been removed and the Key reformatted. You can use this USB Hardware Key in the future to program new Product(s) to it.
