\* **General Note:** The Data Mining OPC server can query a larger variety of databases than what is listed in this matrix. This matrix is designed to show the databases that can be used as configuration databases for many of our configurators and as logging databases for TrendWorX32 Logger and AlarmWorX32 Logger, since they are more limited in the databases that can be used. "Not Supported" in this matrix does not necessarily mean that the Data Mining OPC server will be unable to query the database.

\* **Note for Oracle:** Oracle is only supported for TrendWorX32 and AlarmWorX32 Logging Databases only. We do not allow any version of Oracle to be used as a configuration database. The Oracle Data Connector is required in all versions.

\* **Data Connector Note:** A Data Connection license is required to log to this type of database in this version of GENESIS32. Without this Data Connection license the logger will only log for two hours.
