- A. TEST: Explosive Atmosphere
- B. TEST ITEM: One (1) Model B300 Laptop Computer  
P/N 526283170003, S/N RA4XXB0040
- C. SPECIFICATIONS:
1. MIL-STD-810G, Method 511.5
  2. NTS Procedure Clarification ENV 1
  3. ANSI NCSL Z540-1
  4. ISO 17025:2005
- D. RESULTS:

This is to certify that the Model B300 Laptop Computer was subjected to the Explosive Atmosphere Test according to the above specifications.

Visual examination showed no evidence of physical damage resulting from the test. Getac personnel performed all functional tests (power on/off, keyboard operations, etc.). There was no evidence of main chamber detonation as a result of the operation of the computer during the explosive atmosphere testing. The Model B300 Laptop Computer was returned to Getac, Inc. for post tests and final evaluation.

Test data, an equipment list, and photographs are attached.
