

2-Channel Digital Input Module NAMUR, Ex i

Proximity sensor acc. to DIN EN 50227

Delivery without Mini WSB marker

The digital input module receives the binary signals from sensors operating in hazardous environments of Zones 0 and 1. Namur sensors, optocouplers, mechanical contacts or other actuating elements can be connected by means of approved intrinsically safe devices.

The WAGO-I/O-SYSTEM 750 has to be installed in Zone 2 or in non-hazardous environments. Each sensor is supplied with a short-circuit-protected 8.2 V supply. Indicators: Green LED (signal on/off) An optocoupler is used for electrical isolation between the bus and the field side.

Note:

Only use the digital input module in connection with the 24 V DC Ex i 750-625 Supply Module (note the power supply instructions on page 27)! General information (e.g. installation regulations) on explosion protection is available in the WAGO-I/O-SYSTEM 750 manuals!
